U.S. Patent and Trademark Office PTOL-303 (Rev. 04-01)

Continuation Sheet (PTOL-303) 009/914,033

Application No.

Continuation of 2. NOTE: The recitation concerning maximum and minimum diameters of the roll, added to claim 16, is an example of a new issue requiring further consideration and/or search.

Regarding the proposed new figures 1-6, informalities in the figures are indicated on the PTO-948 attached hereto. In addition to those informalities, the drawings must be corrected to delete the references to the claims in figures 2 and 3. Note, figure 1 should be labeled as two separate figures, e.g. 1A and 1B; the specification must be corrected accordingly. In figure 5, "wrinkles" is misspelled.

Continuation of 5. does NOT place the application in condition for allowance because: Applicant's remarks concerning the Sasaki et al. reference are not persuasive, since the claims as broadly construed read on a roll having a uniform diameter. The Sasaki roll would have a uniform diameter, as indicated by the lack of wrinkles in the material, and the manner in which the roll is made..
